- Course Objectives

This course aims to equip students with a basic understanding of technology English and develop their ability to communicate in English. Through topics commonly found in technology related industries, the course will help familiarize students with English used in different contexts while cultivating their confidence with every-day English conversation.

The course objectives are:

1. To strengthen students' ability with English communication.
2. To cultivate students' understanding of technology English and its related fields.

   To develop students' confidence with English.
